Design software FIXPERIENCE for secure planning.

fischer FIXPERIENCE.

The new design and information software suite.

- The new modular design program includes engineering software and application modules.
- The software is based on international design standards (ETAG 001 EC2), including the national application documents. All common force and measurement units are available.
- Incorrect input will be recognized and the software gives tips to get a correct result. This ensures a safe and reliable design every time.
- The graphical display can easily be rotated through °360, panned, tilted or zoomed as required.
- The 3 D display gives a detailed and realistic image.
- The "live update" feature helps to keep the program up to date ensuring you are always working with the latest version.
- Free download and updates at <http://www.fischer.ae>
