## termoz CS 8

### termoz CS 8 DT 110V

The economical ETICS screwed anchors for all kinds of insulation boards.

# termoz CS 8 / termoz CS 8 DT 110V – the economical ETICS screwed anchors for all kinds of insulation boards.

## Building materials

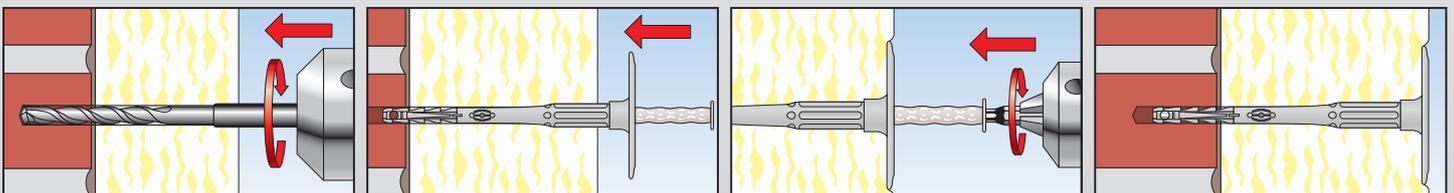

- Suitable for: concrete, solid brick, solid sand-lime brick, solid block made from lightweight or normal weight concrete, vertically perforated brick, perforated sand-lime brick, lightweight aerated concrete, aerated concrete, hollow block made from lightweight concrete

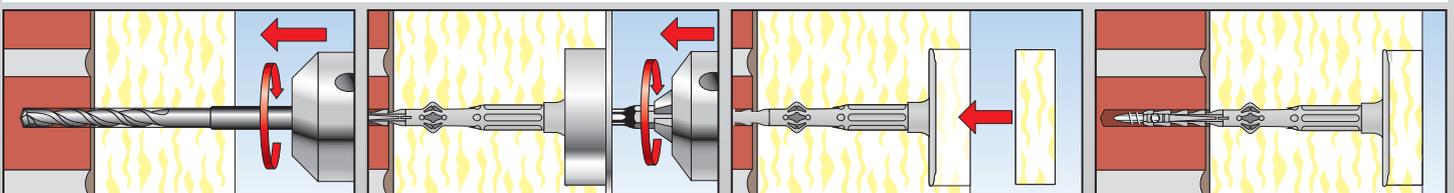

## Your advantages at a glance

- One fixing for all building material categories and insulation boards.
- Quick and easy installation with a standard hammer drill or cordless screw driver.
- Minimum anchorage depth of 35 mm allows for fast installation (25 mm in material category C).
- Countersunk installation: the anchor plate is covered with a cap, thus creating a homogeneous insulation surface allowing for thin render systems.
- The compound screw minimises the thermal bridge. Minimizing any heat losses.
- Private label washers for your individual CD.

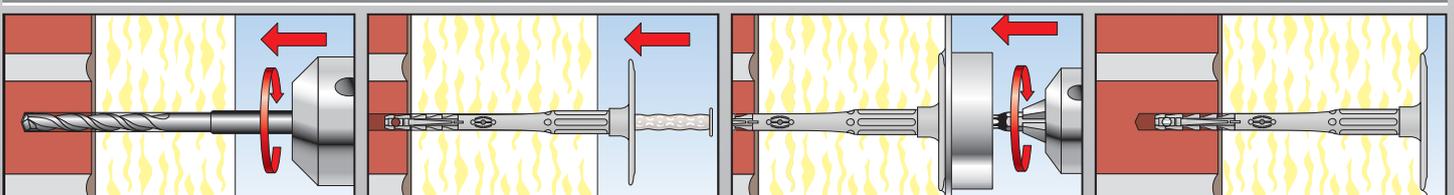

## Standard: Mounting on the surface with standard T30 bit (length 110 - 230 mm).

## Standard: Countersunk mounting with setting tool CS.

## Optional: Mounting on the surface with setting tool CS.

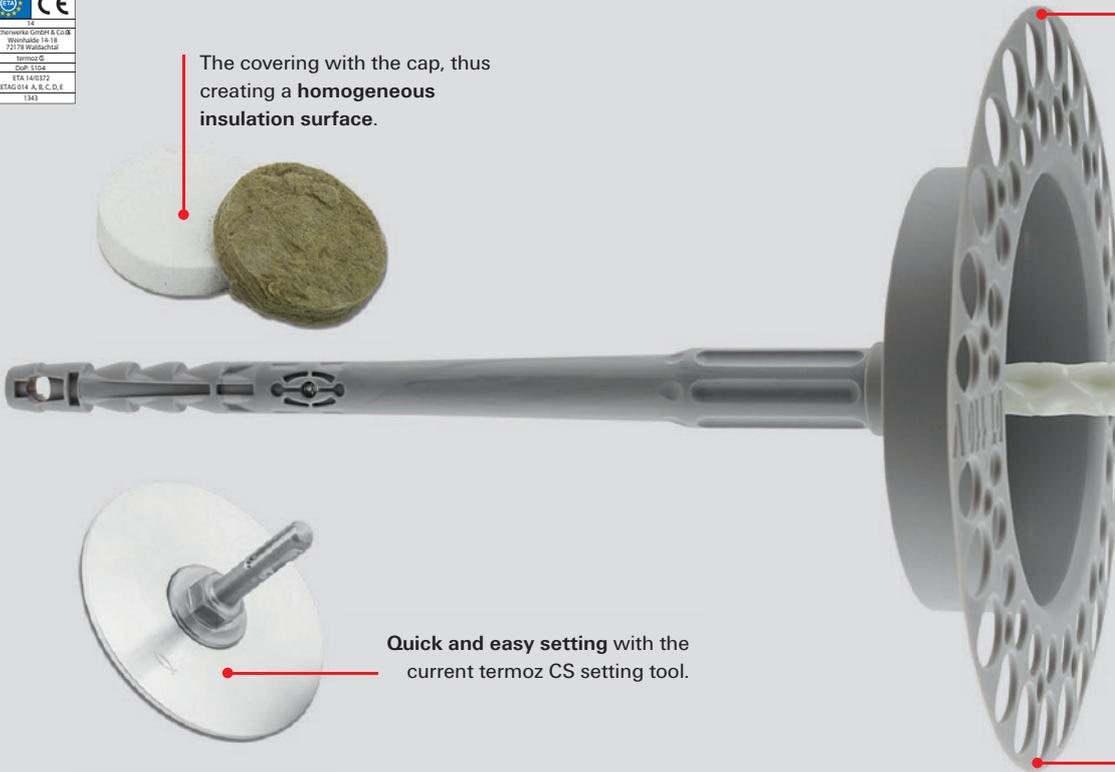

The covering with the cap, thus creating a **homogeneous insulation surface**.

**Pre-assembled anchor with a 110 mm washer for setting in soft insulation boards.**

**Compound screw minimises the thermal bridge.**

**Quick and easy setting with the current termoz CS setting tool.**

With flush installation, the disc tapers to a very thin edge, thus providing for **optimal retaining of the insulation panel** and for application of thin render.

### Building material

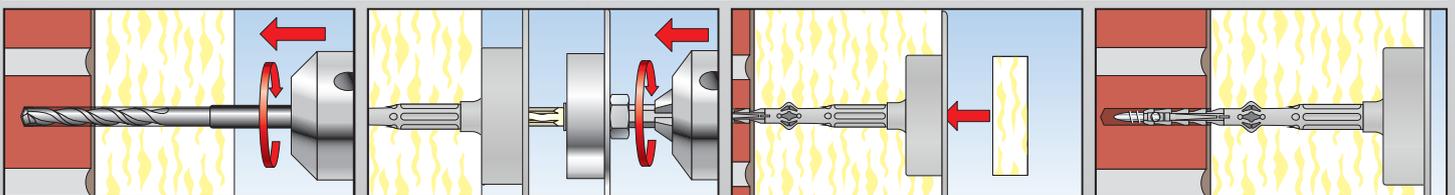

- Suitable for: concrete, solid brick, solid sand-lime brick, solid block made from lightweight or normal weight concrete, vertically perforated brick, perforated sand-lime brick, lightweight aerated concrete, aerated concrete, hollow block made from lightweight concrete.

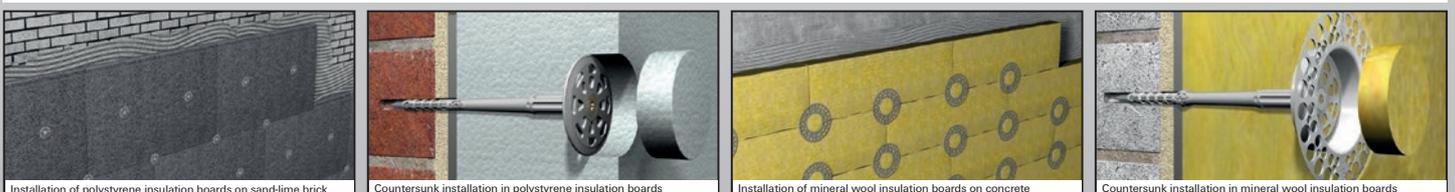

### Your advantages at a glance

- One fixing for all building material categories for fixings in soft insulation boards.
- Quick and easy installation with a standard hammer drill or cordless screw driver.
- Minimum anchorage depth of 35 mm allows for fast installation (25 mm in material category C).
- Countersunk installation with the mineral wool cap provides a smooth surface for thinner render layer.
- The compound screw minimises the thermal bridge. Minimizing any heat losses.

### Standard: Countersunk mounting with setting tool CS.

### Application

Installation of polystyrene insulation boards on sand-lime brick

Countersunk installation in polystyrene insulation boards

Installation of mineral wool insulation boards on concrete

Countersunk installation in mineral wool insulation boards

# Accessories and loads.

## termoz CS 8 / termoz CS 8 DT 110V<sup>3)</sup>

Highest permitted loads<sup>1)4)</sup> of an anchor for multiple use.

For calculating the whole assessment ETA-14/0372 has to be considered.

<sup>1)</sup> The partial safety factor of the resistances and a partial safety factor of a effect of  $\gamma_F = 1,5$  are arranged in the assessment.

<sup>2)</sup> Smallest possible edge distance or axis distance pursuant assessment.

<sup>3)</sup> Anchors for fixing of exteriors insulation combined systems with plaster layer pursuant ETAG014. Only tensile loads of wind effects permitted.

<sup>4)</sup> The specified permitted loads are legal for assembly and usage of anchorage in a dry underground for temperatures up to +24 °C (or. temporary up to +40 °C).

<sup>5)</sup> Anchorage depth up to 45 mm permitted.

<sup>6)</sup> Drilling process hammer drilling.

<sup>7)</sup> Drilling process rotary drilling

<sup>8)</sup> In masonry of building categorie C an anchoring depth of  $h_{nom} = 25$  mm is possible with the same loads.

Starting from a length of 250 mm the T25 bit Art.-No. 533763 is needed.  
R = Version with a long slim shaft for renovation to be installed with bit T25, Art.-No. 533762.

## fischer FIXPERIENCE. The design and information software suite.

- The modular design program includes engineering software and application modules.
- The software is based on international design standards (ETAG 001 and EC2, such as EC1, EC3 and EC5), including the national application documents. All common force and measurement units are available.
- Incorrect input will be recognized and the software gives tips to get a correct result. This ensures a safe and reliable design every time.
- The graphical display can easily be rotated through 360°, panned, tilted or zoomed as required.
- The 3D display gives a detailed and realistic image.
- The "live update" feature helps to keep the program up to date ensuring you are always working with the latest version.
- Free download and updates at [www.fischer.de/fixperience-en](http://www.fischer.de/fixperience-en)

## Our service to you.

We are available to you at any time as a reliable partner to offer technical support and advice:

- Our products range from chemical resin systems to steel anchors through to nylon anchors.
- Competence and innovation through own research, development and production.
- Global presence and active sales service in over 100 countries.
- Qualified technical consulting for economical and compliant fastening solutions. Also on-site at the construction site if requested.
- Training sessions, some with accreditation, at your premises or at the fischer ACADEMY.
- Design and construction software for demanding applications.
